

Currently,

Cultivators mist and fan their mushrooms 4 **times per day** for optimal mushroom growth.

Per batch of mushrooms, a cultivator can expect to dedicate 5 hours to manually controlling environmental conditions.

Rhyzo Automates Mushroom Cultivation

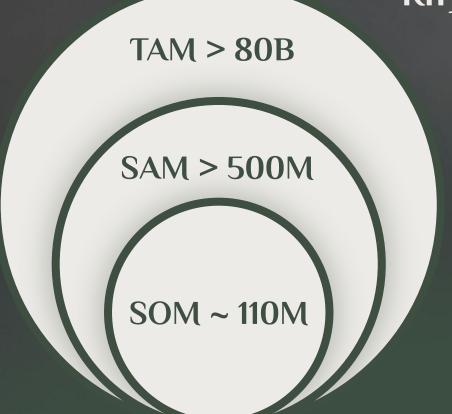

lt's modular, so you can attach the device to **Any** container

Rhyzo's Market is Growing

TAM - Global Mushroom Market (Culinary + Medicinal)

SAM - People potentially interested in At-Home Mushroom Cultivation

SOM - Actively purchasing At-Home Mushroom Cultivators

To us, Values are Central

Virtuous Profits

We are committed to doing our part in collective compassion

Healing Community

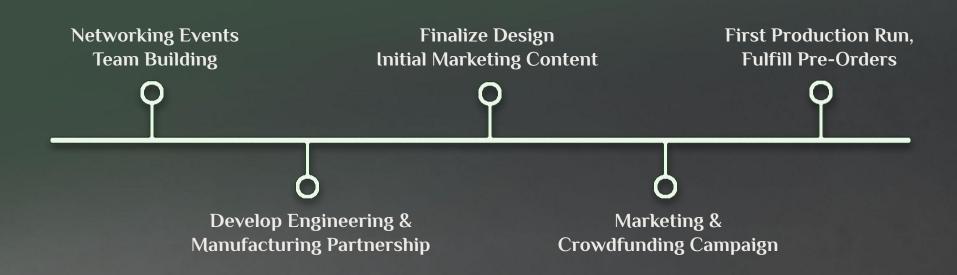

We help people heal themselves and each other using mushrooms.

Peace and Purpose

Everyone involved with Rhyzo deserves a sense of self-actualization

We are Optimistic about our Forecast

Crowdfunding is Booming

within the mushroom-community

Mella \$600K Campaign

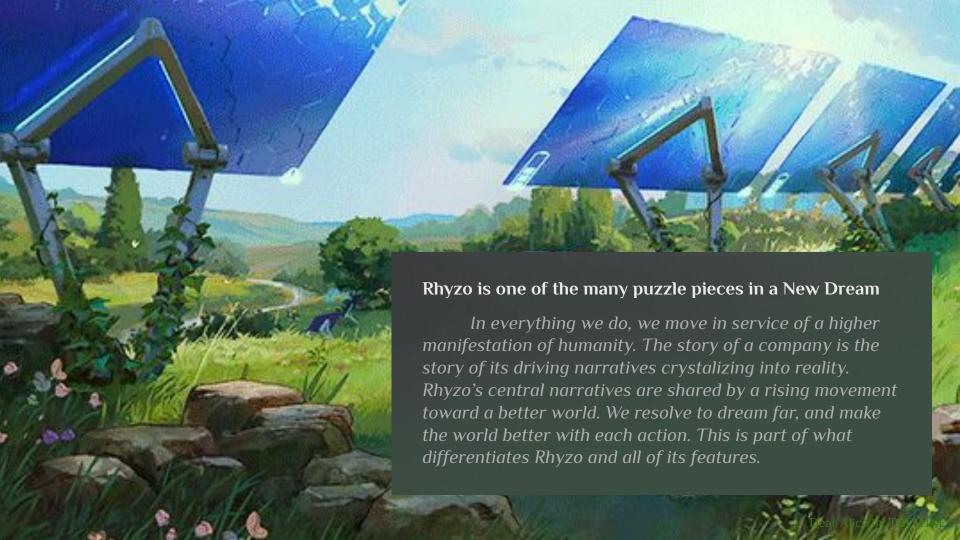

TerraShroom >1.5M Campaign

Shrooly >1.5M Campaign

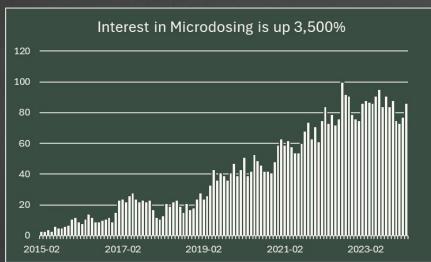

Rhyzo can be purchased for a balanced price that is more accessible to a wide range of mushroom cultivators. Our device meets the needs of cultivators with one tub, or one hundred tubs. Rhyzo can be sold as a luxury item, or as a utility item.

Market Estimates and Forecasts

How did we estimate our SOM?

Based on survey data, we estimate that 30% of invested mushroom cultivators grow psilocybe mushrooms. Of these, we estimate that 25% are registered on Shroomery, and that the average invested cultivator spends at least \$200 on their setup and materials per year.

Under these assumptions, 200 * Relevant registered shroomery users * (1/0.25) * (1/0.3) would yield the approximate yearly spending

We believe that many shroomery users have been conserved sense the 90s, but we decided to only use shroomery users registered in the past 3 years to keep our data as accurate as possible. This yields 40,924 new users. The equation above works out as follows: 200 * 40,924 * 4 * 3.33 = 109,021,536.

Virtuous Profits

Virtue is rewarded. We aim for sustainability, better than fair wages, and better than fair prices. In today's world of groundbreaking efficiency, we won't make compromises along these lines. We are committed to doing our part in collective compassion, and honoring the gift of life without rapacious consumption. Every purchase you make should disproportionately benefit the world rather than disproportionately damage it. This is possible in the world of the New Dream.

Healing Community

A new awareness is spreading. One that embraces a form of community that has been fractured for generations. Mushrooms can be a tool to examine our frameworks, and heal our unconscious wounds. A new form of connection is central to the future of humanity. By creating opportunities for mindful connection, and for individual healing, we resolve to facilitate positive growth opportunities within our community.

Peace and Purpose

We must remember that each experience can be an opportunity to explore our paths to heightened peace and purpose. The journey of self-actualization is a fundamental pillar in the cathedral of the human imperatives. We aim to attentively sculpt every part of this company to serve the human need for self-actualization on the path to peace and purpose. This is the framework we adhere to in our exploration of community, customer relationships, and employment.
